# In-Browser Design - Images & Templating

Images

Images can be used to guide, inspire and influence your web site or application design.
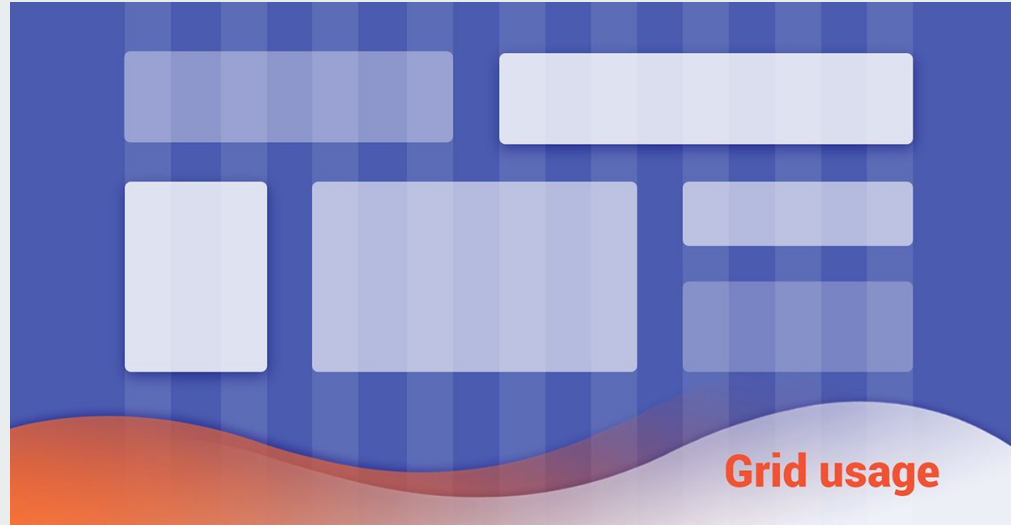

Layout

Images contain layout clues and inspiration.
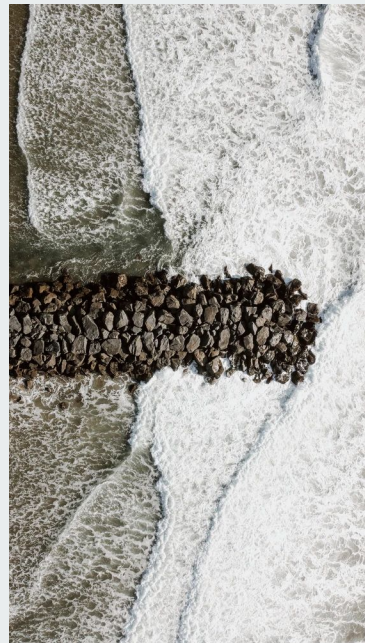

Remember the grid

If you are having any issues with layout use a grid and/or follow a bootstrap template.

Grid usage

Originality

Images can assist with new color and layout ideas.

| #736E5F | #403426 | #261D17 | #F2F2F2 | #D9D9D9 |

# Direction

Images can assist with new color and layout ideas.

Full Background

CSS full background images are an easy way to make web sites look professional and original.

Full Background

Images used within columns or cards

Images can be applied to columns and divs within layouts to present info, products and ideas.
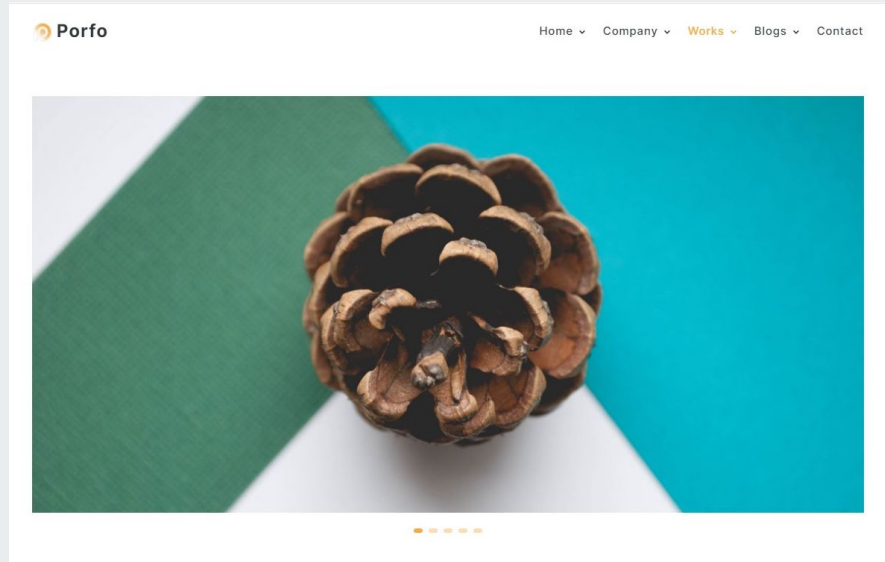

Within a Grid

Images in a grid can work together to form an interactive collage to display information.
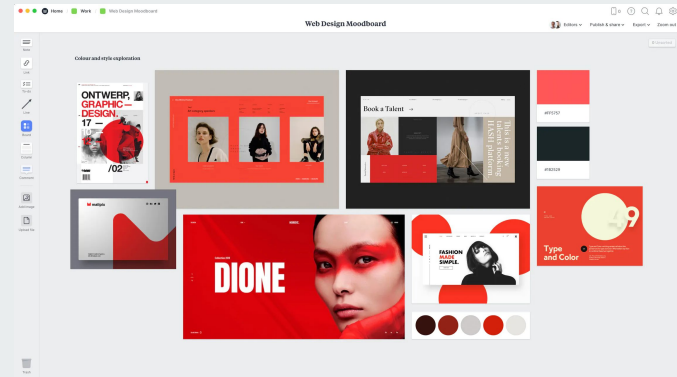

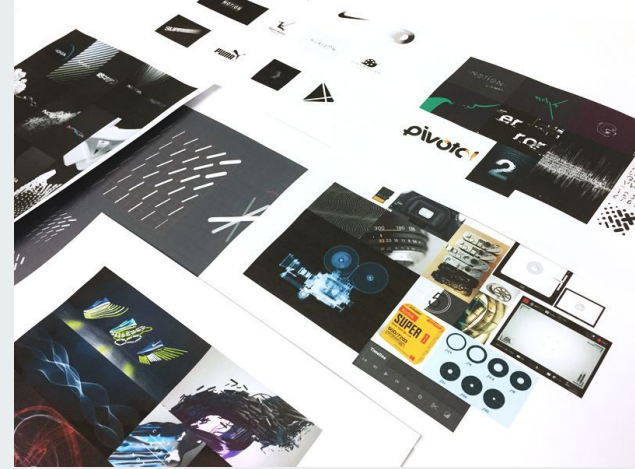

Carousel

Carousels can be of varying sizes and are useful content display tools.

Mood board

Mood boards are a must for any new project. They will help with direction and ideation.

Template variation

Templates come with multiple internal pages and layout ideas. They are a rich source of "safe" design and layout inspiration.
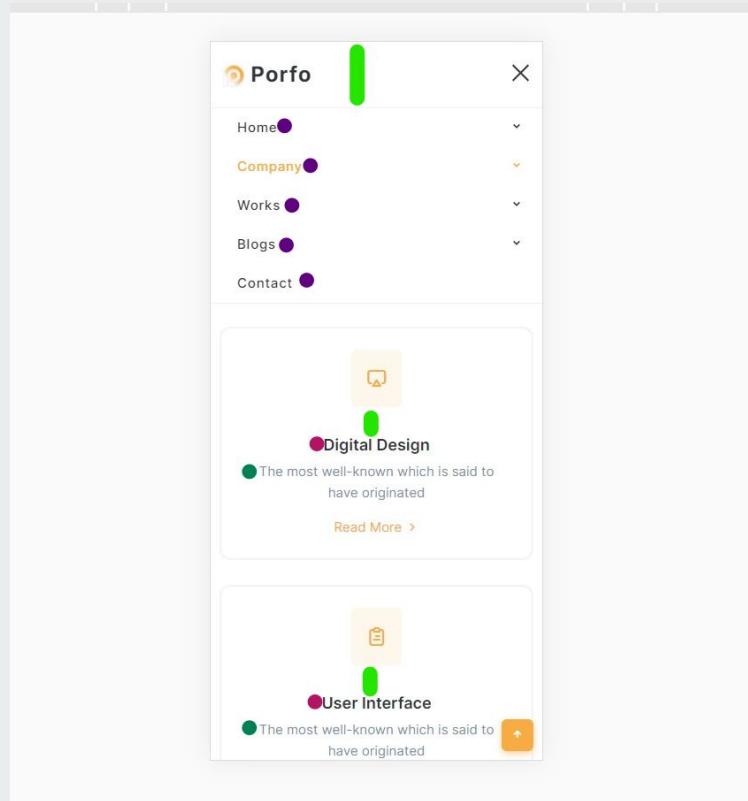

Template variation

Most modern templates will provide mobile layout and design ideas

Template variation

Templates will illustrate how to vary font-size, font-weight, font-color, and use of white space with margin and padding.
